3651

DATE MAILED: 03/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/761,214	GAMBERINI, ERNESTO	
	Examiner	Art Unit	
	Rashmi K. Sharma	3651	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 January 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12 is/are rejected.
- 7) ☒ Claim(s) 13-15 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 22 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the supporting bars having at least two feed channels and the longitudinal plane of symmetry S2 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ansaloni (US Patent number 6,168,048) in view of Leather (US Patent number 6,405,894).

Ansaloni discloses a unit for feeding capsules into a machine for filling capsules (2), the unit comprising a hopper (10) containing the capsules the hopper having a first axis of rotation (X), being fitted with a number of feed channels (16), and rotating continuously about said first axis (X) to move said feed channels about the first axis (X), each feed channel (16) having a longitudinal second axis (along the outer periphery of hopper 10) and receiving the capsules successively from said hopper (10).

Ansaloni also discloses wherein said feed channels (16) are connected to said hopper (10) so that said second axes are equally spaced about said first axis and also comprising a number of supporting bars (27) connected to said hopper (10) and each having at least two respective said feed channels (16), each supporting bar (27) having a longitudinal plane of symmetry (S2) containing said first axis (X), wherein the supporting bars (27) are connected to the hopper (10) so that the longitudinal planes of symmetry are equally spaced (i.e. radial from the first axis X), wherein the feed channels (16) of each of the supporting bars (27) are positioned with the relative said

Art Unit: 3651

second axis substantially parallel to one another and are substantially converging with one another, and to the relative said longitudinal plane of symmetry towards the relative and a first transfer wheel (3) substantially coaxial with the first axis (X) and connected to the hopper (10) to rotate about the first axis, the first transfer wheel (3) also having first seats (6) formed in the first surface, equal to the number of feed channels (16).

Ansaloni as disclosed above fails to show a truncated, conical hopper.

Leather does disclose a truncated, conical hopper (12).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Ansaloni's hopper to be conically shaped, as taught by Leather as a matter of design choice. One having ordinary skill in the art would be reasonably apprised to utilize a conical-shaped hopper arrangement, as conical hoppers are extremely well known in the art.

Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ansaloni (US Patent number 6,168,048) in view of Leather (US Patent number 6,405,894) and Ribani (US Patent number 5,966,910).

Ansaloni as disclosed above, fails to show a second and third transfer wheels and their respective seats being equally spaced about their respective axes.

Ribani does disclose a second (2) or third transfer wheels and their respective seats being equally spaced about their respective central axes.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to add a second or more transfer wheels to Ansaloni's invention, as

Art Unit: 3651

taught by Ribani, in order to provide for further conveyance of the articles. Multiple transfer wheels within feeding capsule units are extremely well known in the art.

Allowable Subject Matter

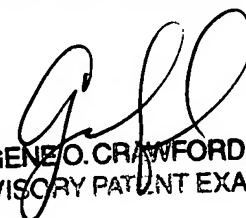

Claims 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rashmi K. Sharma whose telephone number is 571-272-6918. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Crawford can be reached on 571-272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
